# **INSTRUCTIONS FOR** CLOR-D-TECT®10

**Used Oil Screening Kit** 

Test kit for chlorine contamination in used oil

- Tube #1 A plastic test tube with a white dispersing cap containing a blismess ampule (bottom) and a yellow-dotted, gray ampule (top).
- Tube #2 A plastic test tube with yellow cap containing 7 ml of buffer solution, a yellow-dotted ampule (bottom) and a red-green ampule (top).
- A 1 ml polypropylene sampling syringe and a tissue wipe.
- A plastic filtration funnel.
- A glass ampule contained in a cardboard sleeve and plastic tube designated as "Disposal Ampule".

READ CAUTION AND INFORMATION SECTIONS ON BACK BEFORE PERFORMING TEST. WEAR RUBBER GLOVES AND SAFETY GLASSES.

#### **DIRECTIONS**

- PREPARATION Remove contents from box. Check contents to ensure that all items are present and intact. Place the two plastic tubes into the holder at the front of the box.
- SAMPLE PREPARATION Unscrew the white dispensing cap from Tube #1. Work the plunger on the empty sampling syringe a few times to ensure that it slides easily. Place the tip of the syringe into the oil sample to be tested and slowly pull back on the plunger until it reaches the stop and cannot be pulled further. Remove the syringe from the oil sample and wipe any excess oil from the outside of the syringe with the enclosed tissue. Place the tip of the syringe in Tube #1 and dispense the oil sample by depressing the plunger. Replace the white dispensing cap securely.
- 3. REACTION Break the bottom (colorless) ampule in the tube by compressing the sides of the tube. Mix thoroughly by shaking the tube vigorously for about 30 seconds. Break the top (gray) ampule in the tube and shake thoroughly for about 20 seconds. Allow the reaction to proceed for an additional 40 seconds (total of one minute), while shaking intermittently several times.
- EXTRACTION Remove the caps from both tubes and pour the clear buffer solution from Tube #2 (yellow cap) into Tube #1. Replace the white cap tightly on Tube #1 and shake vigorously for about 10 seconds. Vent the tube carefully by partially unscrewing the dispensing cap. Close securely and shake well for an additional 10 seconds. Vent again, tighten cap and stand tube upside down on its cap. Allow the phases to separate for a full
- 5. ANALYSIS Put the plastic filtration funnel into Tube #2. Position Tube #1 over funnel and open nozzle on the dispensing cap. Be sure to point the nozzle away from the operator while opening it, and check that the nozzle is open completely before dispersing the clear solution. Dispense 5 mls of the clear solution through the filter into Tube #2 (up to the 5 ml line) by squeezing the sides of Tube #1. Close the nozzle on the dispensing cap on Tube #1 and remove the filter funnel from Tube #2. Replace the yellow cap on Tube #2 and break the bottom (colorless, yellow-dot) ampule and shake for 10 seconds. Break the top (colored) ampule and shake for 10 seconds.
- 6. RESULTS Observe the resultant color immediately and compare to the color chart below for chlorine determination.
- DISPOSAL Open the "Disposal Ampule" container and drop the ampule into Tube #2. Replace the cap on the test tube. Crush the ampule by squeezing the sides of the tube. Shake for 5 seconds. This reagent immobilizes the mercury so that the kit passes the EPA's TCLP test. See caution section below for additional information on disposal,

CLOR-D-TECT 1000 IS A TRADEMARK OF THE DEXSIL CORPORATION AND IS COVERED UNDER U.S. PATENTS 5.013.667.

# SUGGESTIONS FOR USING THE CLOR-D-TECT® 1000 TEST KIT

- To test at 500 ppm chlorine instead of 1000, double the oil sample size by filling the sampling syringe twice.
- The kit is designed for testing used oils, and is not intended for use on water/oil mixtures that contain more than 20% water. For samples that contain more than 20% water, contact Dexsil about our Hydroclor-Q® kit designed for testing samples for chlorinated organic compounds in water.
- The kit works well on all types of waste and used oils including crankcase, hydraulic, diesel, lubricating, fuel oils and kerosene. It is designed for use only on oils which are hydrocarbon-based. Some oil, such as cutting oils which contain more than 3 or 4% sulfur, may give false positive results, false negatives are, however, unlikely. For any questions regarding the applicability of the kit on your sample, contact Dexsil's technical service department.
- The kit should be examined upon opening to see that all of the components are present and that all the ampules (5) are in place and not leaking. The liquid in Tube #2 (yellow cap) should be approximately 1/2 inch (1 cm) above the 5 ml line and the tube should not be leaking. The ampules are not intended to be completely full.
- Perform the test in a warm, dry area with adequate light. In cold weather, a truck cab is sufficient. If a warm area is not available, Step 3 should be performed while warming Tube #1 in palm of hand.
- Always crush the clear ampule in each tube first. If this sequence has not been followed, stop the test immediately and start over using another complete kit. When an incorrect testing sequence is followed, a false negative may result which may allow a contaminated sample to pass without detection.
- In Step 4, tip Tube #2 to an angle of only 45° to prevent the ampule holder from sliding out.

#### CAUTION

- When crushing the glass ampules, press firmly in the center of the glass ampule ONCE. Never attempt to recrush broken glass as it may come through the plastic and cut fingers.
- In case of accidental breakage onto skin or clothing, wash immediately with large amounts of water. All the ampules are poisonous and should not be taken internally.
- Do not carry kits on passenger aircraft.
- The gray ampule in the white-capped test tube contains metallic sodium.
   Metallic sodium is a flammable solid and is water reactive.
- Wear rubber gloves and safety glasses while performing test.
- Dispose of used kits properly. The mercury in Tube #2 is made insoluble by the disposable ampule and used kits will pass the USEPA TCLP test for land disposal. More stringent state and local regulations may apply. Contact Dexsil if you have any specific questions concerning disposal procedure.
- Read the Material Safety Data Sheet before performing the test.
- Keep Out of Reach of Children.

#### **MANUFACTURER'S WARRANTY**

This kit is warranted to be free of defects in material and workmanship until the expiration date stamped on the box. Manufacturer's sole and exclusive liability under this warranty shall be limited to replacement of any kit that is proved to be defective. Manufacturer shall not be liable for any incidental or consequential damages.

Reliable test results are highly dependent upon the care with which the directions are followed and, consequently, cannot be guaranteed.

This kit was manufactured by LEX51L Corporation

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout title as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination. This fill of Lading is a receipt for goods, it is not of itself a contract of carriers in its mutually agreed, as to each carrier of all or as to any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shapper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

#### **CONSIGNED TO:**

## Waste Pre-Acceptance/Approval Letter

Date 8/25/2005

Dear Chuch McCurdy

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1101

Generator: OEM

Address: 6401 West Sam Houston Pkwy North

Houston, TX 77041

#### Waste Information

Name of Waste: Recyclable Oil / Water Mixture

TCEQ Waste Code #: N/A

Container Type: Other

Bulk

Detailed Description of Process Generating Waste:

Material generated from equipment oil changes.

Color: Light Brown

Odor: Oil Like

pH: Neutral

Physical State: Liquid

Incompatibilities: Oxidizers

Safety Related Data/Special Handling:

No

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

# Waste Pre-Acceptance/Approval Letter

Date 1/13/2009

Dear Laura Yakubec

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3146

Expiration Date 1/13/2011

Generator: Letourneau Technologies

Address: 6401 West Sam Houston Parkway

Houston, TX 77041

#### Waste Information

## Waste Pre-Acceptance/Approval Letter

Date 1/12/2009

Dear Richard Garza

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3143

Expiration Date 1/12/2011

Generator: Letourneau Technologies (Federal Road)

Address:

Houston, TX 77015

Waste Information

Name of Waste: Gasoline Mixture TCEQ Waste Code #: recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

old gasoline removed from equipment

Color: brown Odor: gasoline pH: 5-9

**Physical State:** 

Incompatibilities: none

Safety Related Data/Special Handling:

level C

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

(1)  If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcate	догу,
(2)  If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrate excess of the values listed below, the waste should be classified in the metals subcategory.  Cadmium: 0.2 mg/L  Chromium: 8.9 mg/L  Copper: 4.9 mg/L  Nickel: 37.5 mg/L	ons in
(3)  If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium or nickel above any of the values listed above, the waste should be classified in the organics subcategory.  Metals Subcategory  Oils Subcategory  Organics Subcategory	n, copper,
SECTION 10 Additional Instructions	
If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentration will be prior to acceptance. The generator will be responsible for the cost of the analysis.	
SECTION 11: Generator's Certification  The information contained herein is based on generator knowledge and/or analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of compostion properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

## Waste Pre-Acceptance/Approval Letter

Date 1/13/2009

Dear Laura Yakubec

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3146

Expiration Date 1/13/2011

Generator: Letourneau Technologies

**Address:** 6401 West Sam Houston Parkway

Houston, TX 77041

Waste Information

Name of Waste: Oil Filters
TCEQ Waste Code #: recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

oil filters from basic maintenance operations

Color: varies Odor: hydrocarbon pH: na

**Physical State:** 

Incompatibilities: oxidizers

Safety Related Data/Special Handling:

standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

# Waste Pre-Acceptance/Approval Letter

Date 1/12/2009

Dear Richard Garza

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3141

**Expiration Date** 1/12/2011

Generator: Letourneau Technologies (Federal Road)

Address:

Houston, TX 77015

Waste Information

Name of Waste: Empty drums & totes

TCEQ Waste Code #: Recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

empty 55 gallon metal & poly drums & totes

Color: varies

Odor: none pH: na

**Physical State:** 

Incompatibilities: none

Safety Related Data/Special Handling:

standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

Organics Subcategory: Subpart C         □ Landfill leachate       □ Contaminated groundwater clean-up from non-petroleum sources         □ Solvent-bearing wastes       □ Off-specification organic product         □ Still bottoms       □ Byproduct waste glycol         □ Wastewater from paint washes       □ Wastewater from adhesives and/or epoxies formulation         □ Wastewater from organic chemical product operations       □ Tank clean-out from organic, non-petroleum sources
(1) If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcategory.
If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.  Cadmium: 0.2 mg/L  Chromium: 8.9 mg/L  Copper: 4.9 mg/L  Nickel: 37.5 mg/L
(3)  If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or nickel above any of the values listed above, the waste should be classified in the organics subcategory.  Metals Subcategory  Oils Subcategory  Organics Subcategory
SECTION 10 Additional instructions
if you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.
SECTION 11: Generator's Certification  The information contained herein is based on generator knowledge and/or analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of compostion properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

(1) If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcategory.
(2)  If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.  Cadmium: 0.2 mg/L  Chromium: 8.9 mg/L  Copper: 4.9 mg/L  Nickel: 37.5 mg/L
(3)  If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or nickel above any of the values listed above, the waste should be classified in the organics subcategory.  Metals Subcategory  Oils Subcategory  Organics Subcategory
SECTION 10 Additional instructions
If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.
SECTION 11: Generator's Certification  The information contained herein is based on generator knowledge and/or analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of compostion properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

(2)  If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.  Cadmium: 0.2 mg/L  Chromium: 8.9 mg/L  Copper: 4.9 mg/L  Nickel: 37.5 mg/L
(3)  If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or nickel above any of the values listed above, the waste should be classified in the organics subcategory.  Metals Subcategory  Oils Subcategory  Organics Subcategory
SECTION 10 Additional Instructions
If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.
SECTION 11: Generator's Certification  The information contained herein is based on generator knowledge and/or analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of compostion properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

Released By: Sonia West

Title:

Senior Project Manager

Date:

12/31/2008

This Laboratory is NELAP (T104704213-08-TX) accredited. Effective: 07/01/2008; Expires: 06/03/2009 Scope: Non-Potable Water, Drinking Water, Air, Solid, Hazardous Waste

I am the laboratory manager, or his/her designee, and I am responsible for the release of this data package. This laboratory data package has been reviewed and is complete and technically compliant with the requirements of the methods used, except where noted in the attached exception reports. I affirm, to the best of my knowledge that all problems/anomalies observed by this laboratory (and if applicable, any and all laboratories subcontracted through this laboratory) that might affect the quality of the data, have been identified in the Laboratory Review Checklist, and that no information or data have been knowingly withheld that would affect the quality of the data.

This report cannot be reproduced, except in full, without prior written permission of A&B Labs. Results shown relate only to the Items tested. Samples are assumed to be in acceptable condition unless otherwise noted. Blank correction is not made unless otherwise noted. Air concentrations reported are based on field sampling information provided by client.

Date Received: 12/19/2008 10:45

LeTournezu Technologies (LeTournezu Technologies Houston)

Production Waste

			able – Domestic

SHIPPED FROM:	CES Profile #
LeTourneau Technologies	11a) 2948
6401 West Sam Houston Parkway	116)
Houston, TX 77041	11c)
(832) 782-6655	11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the world carrier below understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of listelf a contract of carriage, it is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract, between shall be carried or intermediany.

For payment: Charges to be billed to Shipper or the "Gilled to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill shipper or the "Billed to" party and sent to:

**CONSIGNED TO:** 

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

**CARRIER:** 

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labelled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Bitigment moves between to puris by a certier by water, the law requires that the Bill of Lacing shall state whether it is "carrier's or straper's water."

Intermodal Certificate: All Information required by Federal Highway Administration regulations at 49 CFR 390,940 Implementing the intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name iterein is the tendening party.

LeTourneau Technologica(LeTourneau Technologica Houston)

Original – Shipper Provided Short Form Straight Bill of Lading – Not Negotiable – Domestic

SHIPPED FROM:

LeTourneau Technologies
6401 West Sam Houston Parkway
Houston: TX 77041
(832) 782-6655

11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination. You its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shapper and carrier or intermediary.

For payment. Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The critic copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

#### **CONSIGNED TO:**

Pollution Control Industries

5485 Tay For Dr

Millington, TN 38053

**CARRIER:** 

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a camer by water, the law requires that the SHI of Lading shall state whether it is "carrier's or shipper's welcom."

Intermodal Centricate: All-Information required by Federal Hightest Administration regulations at 49 CFR 392 595 implementing the Intermodal Safe Container Act of 1932 is set forth on the face of this bill of lading. The shipper name herein is the tendening party.

Bill Of Lading #:

62386

Folder ID : LeTourneau Technologice(LeTourneau Production Waste	Technologies Houston)	
Original – Shipper Provided Short Form Straig	ht Bill of Lading – Not Negotiable – Domestic	
SHIPPED FROM:	CES Profile #	
LeTourneau Technologies	11a)	
6401 West Sam Houston Parkway	11b)	
Houston , TX 77041	11c)	
(832) 782-6655	11c)	

The property described below, in apparent good order, except as mated (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in passession of the property under the contract) agrees to carry to its unusual place of delivery at said destination. If on its route, otherwise to deliver to archier carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shapper and carrier or intermediary.

For payment Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submatted to Shipper or the "Billed to" party and sent to:

#### **CONSIGNED TO:**

Letourneau Technologies

#### **CARRIER:**

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether it is "contents or shipper's weight."

intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.543 implementing the intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendening party.

LeTournezu Technologies(LeTournezu Technologies Houston)

Production Wasie

Original - Shipper Provided Short Form Straight Bill of Lading - Not Negotiable - Domestic

SHIPPED FROM:
LeTourneau Technologies
6401 West Sam Houston Parkway
Houston, TX 77041
(832) 782-6655
CES Profile #
11a) 1294
11b)
11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual piece of delivery at said destination. This Bill of Lading is a receipt for goods, it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, first every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

## Waste Pre-Acceptance/Approval Letter

Date 8/22/2008

Dear Keith Hoye

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 2948

Expiration Date 8/22/2010

Generator: Letourneau Technologies

Address: 6401 West Sam Houston Parkway

Houston, TX 77041

Waste Information -

Name of Waste: oil filters
TCEQ Waste Code #: Recycle

Container Type:

**Detailed Description of Process Generating Waste:** 

spent oil filters from equipment fluid changes

Color: varous

Odor: oil like

pH: neutral

**Physical State:** 

Incompatibilities: strong oxidizers
Safety Related Data/Special Handling:

std

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

Interceptor wastes  Off-specification fuels  Underground storage remediation waste  Tank clean-out from petroleum or oily sources  Non-contact used glycols  Aqueous and oil mixtures from parts cleaning operations  Wastewater from oil bearing paint washes
Organics Subcategory: Subpart C         Landfill leachate         Contaminated groundwater clean-up from non-petroleum sources         Solvent-bearing wastes         Off-specification organic product         Still bottoms         Byproduct waste glycol         Wastewater from paint washes         Wastewater from adhesives and/or epoxies formulation         Wastewater from organic chemical product operations         Tank clean-out from organic, non-petroleum sources
(1)  If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcategory.
If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.  Cadmium: 0.2 mg/L  Chromium: 8.9 mg/L  Copper: 4.9 mg/L  Nickel: 37.5 mg/L
(3)  If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or nickel above any of the values listed above, the waste should be classified in the organics subcategory.  Metals Subcategory  Oils Subcategory  Organics Subcategory
SECTION 10 Additional instructions
If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.
SECTION 11: Generator's Certification  The information contained herein is based on  generator knowledge and/or  analytical data.  I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of compostion properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

## Waste Pre-Acceptance/Approval Letter

Date 3/31/2008

Dear **Keith Hoye** 

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

**CES Profile #** 2675

**Expiration Date** 3/31/2010

Generator: LeTourneau Technologies

Address: 6401 West Sam Houston Parkway

Houston, TX 77041

#### Waste Information

Name of Waste: Polymerised varnish resin

TCEQ Waste Code # CESQ4032

**Container Type:** tote with sac

**Detailed Description of Process Generating Waste:** 

Unused resin that polymerized in a tank and collected from the cleaning of the tanks

Color: amber Odor: resin like pH: neutral

**Physical State:** 

Incompatibilities: bases, oxidizers Safety Related Data/Special Handling:

level D

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President

CES Environmental Services, Inc.

#### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

Refer to other MSDS sections for detailed information.

TARGET ORGANS:

Eyes. Respiratory System.

EFFECTS FROM ACUTE EXPOSURE:

INGESTION:

Harmful if swallowed. Causes vomiting, nausea, and

PRODUCT CODE:

777C 777C

Page 1 of 8

diarrhea. May cause pulmonary edema.

SKIN CONTACT:

Causes moderate skin irritation.

INHALATION:

Excessive inhalation causes headache, dizziness,

nausea and incoordination.

EYE CONTACT:

Causes mild eye irritation.

AGGRAVATED MEDICAL CONDITIONS:

None known.

EFFECTS OF CHRONIC EXPOSURE:

Corneal damage. Pulmonary edema. Evidence of fetotoxicity potential has been reported for vinyl

toluene in a recent intraperitoneal study.

CARCINOGENICITY COMMENT:

This product or one of its ingredients present 0.1% or

more is NOT listed as a carcinogen or suspected

carcinogen by NTP, IARC, or OSHA'.

CARCINOGENICITY:

This space reserved for special use.

ROUTES OF ENTRY:

Ingestion. Dermal - skin. Eyes. Inhalation.

OTHER:

None known.

#### FIRST AID MEASURES

INGESTION:

Do not induce vomiting. Slowly dilute with 1-3glasses of water and seek medical attention. Never give anything by mouth to an unconscious person.

SKIN CONTACT:

Remove contaminated clothing and launder before reuse. Wash with soap and water. Get medical attention if

irritation persists.

INHALATION:

If inhaled, remove to fresh air. 'If not breathing give artificial respiration using a barrier device. If

breathing is difficult give oxygen. Get medical

attention.

EYE CONTACT:

In case of contact, or suspected contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention immediately after

flushing.

NOTES TO PHYSICIAN:

Aspiration may cause severe lung damage. Evacuate

stomach in a way which avoids aspiration.

#### 5. FIRE FIGHTING MEASURES

FLASH POINT (F):

113

(C): 45

FLASH POINT METHOD:

Pensky-Martens Closed Cup (PMCC)

PRODUCT CODE:

777C 777C

Page 2 of 8

IGNITION TEMP (F):

Unknown

(C): Unknown

OSHA FLAMMABILITY CLASSIFICATION:

Combustible Liquid, Class II

FLAMMABLE LIMITS IN AIR - LOWER (%):

FLAMMABLE LIMITS IN AIR - UPPER (%):

5.2

SENSITIVITY TO MECHANICAL IMPACT (Y/N):

No

SENSITIVITY TO STATIC DISCHARGE:

Sensitivity to static discharge is expected; material has a flash point below 200 F (93

C).

EXTINGUISHING MEDIA:

Alcohol foam. Carbon dioxide. Dry chemical.

Foam. Water mist.

FIRE FIGHTING PROCEDURES:

Vapors may form explosive mixture with air. Combustible. Wear respiratory protection if in a confined area. Cool exposed containers with water spray after extinguishing fire. Positive pressure self-contained breathing apparatus. Polymerization may take place during a fire due to elevated temperature where closed containers could violently rupture. Evacuate area and fight fire from a safe distance. Organic peroxide.

#### 6. ACCIDENTAL RELEASE MEASURES

#### ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal. Wear proper protective equipment as specified in the protective equipment section. Remove sources of ignition. Warn other workers of spill. Increase area ventilation.

#### 7. HANDLING AND STORAGE

#### PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Use ground strap and appropriate precautions for dispensing flammable liquids. Recommended storage in original container at temperature below 30 C (85 F). Avoid breathing vapors, if exposed to high vapor concentration, leave area at once. Avoid contact with skin and eyes. Open container cautiously. Use only in a well ventilated area. Caution: Combustible. Keep container closed when not in use to prevent contact with acidic, basic or oxidizing materials. Cure only where appropriate ventilation systems exist. Keep away from food and smoking materials. Wash hands before eating and smoking.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:

Exhaust ventilation. Eyewash stations. Use in a well

ventilated area.

PRODUCT CODE:

777C 777C

Page 3 of 8

. 09

RESPIRATORY PROTECTION:

Use in a well ventilated area. Use approved NIOSH

respiratory protection if TLV exceeded, or over

exposure is likely.

**GLOVES:** 

Neoprene gloves.

EYE PROTECTION:

Safety glasses.

OTHER PERSONAL PROTECTION DATA: Rubber apron.

· VENTILATION:

Use only in well ventilated area. Mechanical

ventilation.

#### 10. STABILITY AND REACTIVITY

CHEMICAL STABILITY:

Stable.

HAZARDOUS POLYMERIZATION:

. May occur.

HAZARDOUS DECOMPOSITION PRODUCTS:

Carbon monoxide. Carbon dioxide. Alcohols. Organic acid vapors. Methane. Acetophenone.

Alpha methylstyrene.

MATERIALS TO AVOID:

Avoid contact with acidic, basic or oxidizing agents. Metal salts such as aluminum chloride.

CONDITIONS TO AVOID:

Keep away from heat, sparks and flame.

#### 11. TOXICOLOGICAL INFORMATION

COMPONENT INFORMATION:

Vinyl Toluene 25013-15-4

ACUTE ORAL LD50 (MG/KG):

NFPA 704 Hazard Rating: -----

4-Extreme 3-High

Health: 2 Flammability: 2

2-Moderate 1-Slight 0-Insignificant

instability: 0 Special:

Special Fire Fighting Procedures:

Firefighters should wear a self-contained breathing apparatus and full protective gear. Cool fire-exposed containers with water spray to prevent bursting.

Unusual Fire and Explosion Hazards:

Vapors are heavier than air and may travel to distant and/or low-lying sources of ignition and flashback. Product may produce a floating fire

hazard as liquid floats on water. The use of water spray (fog), while effective, may cause frothing and foaming. Never use a water jet as this will just spread the fire. Use care as spills may be slippery.

#### Section V - Health and Hazard Data

#### Threshold Limit Value:

5 mg/m<sup>3</sup> as Qil Mist

1.

#### Effects of Overexposure:

#### Acute: (Short Term Exposure)

EYE CONTACT: Causes irritation seen as stinging, tearing, and redness.

SKIN CONTACT: Causes irritation seen as itching and redness. May cause allergic skin reaction seen as delayed skin rash which may be followed by blistering, scaling, and other skin effects. Prolonged or repeated contact, as from clothing wet with material, may cause drying, defatting, and cracking of the skin.

INHALATION: May cause respiratory irritation seen as coughing and sneezing. May cause an allergic respiratory reaction. At low vapor concentrations, no harmful effects are expected. At high vapor concentrations, inhalation may cause central nervous system effects such as headache, dizziness, drowsiness, weakness, unconclousness, possible anosthetic effects from central nervous system depression, and may be fatal.

INGESTION: May cause Irritation with possible nauses, vomiting, and diarrhea. Ingestion and subsequent vomiting of this product can lead to aspiration of the product into the lungs which can cause damage and may be fatal.

#### Chronic: (Long Torm Exposure)

May cause skin and respiratory sensitization to those individuals sensitive to orange oil. On rare occasions, prolonged and repeated exposure to Hydrocarbon Mist poses a risk of chronic lung inflammation. This condition is usually asymptomatic as a result of repeated small aspirations. Shortness of breath and coughing are the most common symptoms. Aspiration may lead to pulmonary edems and hemorrhage and may be fatal. Signs of lung involvement include increased respiration and heart rates as well as a bluish discoloration of the skin. Chronic skin contact may promote dermatitis and oil acne. In rarer cases, an increased sensitivity to sunlight (photosensitivity) may occur.

Medical conditions aggravated by exposure are pre-existing respiratory and skin conditions such as asthma, emphysema, and dermatitis. TARGET ORGANS: Blood-forming organs, central nervous system, and lungs. The primary routes of exposure are skin and eye contact.

Primary Routes	of Entry	M #AT//
[v] Inhalation	( ) Ingestion	[√] Absorption

#### Emergency First Ald Procedures:

#### Inhalation:

Remove from the area to fresh air. If not breathing, clear the airway and start mouth to mouth artificial respiration. Get immediate medical attention.

#### Eve Contact:

Rinse the eyes with water. Remove any contact lenses and continue flushing with plenty of water for several minutes. Seek medical attention if irritation develops.

#### Skin Contact

Wash affected areas with large amounts of soap and water for 15 minutes. Remove contaminated clothing and shoes. Seek medical attention if imitation persists. Wash clothing and clean shoes before re-use.

#### ingestion

Give 3 to 4 glasses of water, but DO NOT induce vomiting. If vomiting occurs, give fluids again. Get immediate medical attention. Do not give snything by mouth to an unconscious or convulsing person.

#### Notes to Physician:

Ingestion and subsequent vomiting of this product can lead to aspiration of the product into the lungs which can cause damage and may be fatal. Depending on the amount ingested and reteined as well as the toxicity of the product, gastric lavage should be considered. Keep patient's head below hips to prevent pulmonary aspiration. If comatose, a cuffed endotracheat tube will prevent aspiration. In severe cases of an allergic reaction, anaphylactic shock may occur. Have the person lie down with their legs above their chest to increase blood flow to the heart and brain. Ensure respiratory support by supplying oxygen and administer epinephrine as indicated.

#### Section VI - Toxicity Information

Product Contains Chemicals Listed as Carcinogen or Potential Carcinogen By:						
[] IARC	[]NTP	[]OSHA	( ) ACGIH	[ ] Other		

Total VOC Content: 100% by weight; 100% by volume, 820 g/L

VOC Content acter low vapor exemption; 30% by weight; 29% by volume; 237 g/L

SYNTHETIC ISOPARAFFINIC HYDROCARBON (<3% DMSO extractables)

IHL-RAT LC<sub>50</sub>: >290 ppm 3.

ORL-RAT LD50; >10 g/kg 3.

EYE IRRITATION: slight 3

This hydrocarbon was administered orally 5 days/week to male and female rats at 100, 500 or 1000 mg/kg for 13 weeks. An additional group was dosed with 100 mg/kg for 13 weeks followed by a 4-week recovery period. No mortalities or clinical effects were observed. Liver and kidney weights for the 500 and 1000 mg/kg exposure groups were significantly increased. After the 4-week recovery period, there were no differences in organ weights.

3.

Mineral Oil and Hydrocarbon Mists derived from highly Refined Oils and Petrolaum Distillates are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloms formation, and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations at or near current work place exposure levels produced no significant toxicological effects, in long term studies (up to two years), no carcinogenic effects have been reported in any animal species tested. These Petrolaum Distillates are severely hydrotreated, severely solvent extracted, and/or processed by mild hydrotreatment and extraction. For this reason, they are not classified as cancer hazards.

3.

	Conditions to Avoid: Avoid heat, hot surfaces, a	parks, and open flames.		Conditions to Avoid: N/A	
1			1 I.		

Incompatibility (Materials to Avoid):

Strong oxidizing agents such as Chlorine bleach and concentrated Hydrogen Peroxids. Acids, clays, Aluminum Chloride, halogens, lodine Pentafluoride, Vinyl Chloride plastics, and rubber.

Hazardous Decomposition Products:

Oxides of Carbon. Smake.

#### Section VIII - Spill Or Leak Procedures

Steps to be Taken if Material is Released or Spilled:

Wear appropriate protective clothing. Eliminate all sources of ignition and ventilate the area, Use only non-sparking equipment. Use care as spills may be slippery. Shut off source of leak, Dike and contain spill. Absorb with an inert material and transfer all material into a properly labeled container for disposal. Prevent product from contaminating soil or from entering sewage and drainage systems and bodies of water. Flush area with water.

Waste Disposal Method(s):

Dispose of in accordance with all Federal, State, and local regulations.

Neutralizing Agent:

N/A

#### Section IX - Special Protection Information

Regulred Ventilation:

Local ventilation is recommended to control exposure from operations that can generate excessive levels of mists. Local ventilation is preferred, because it prevents dispersion into work areas by controlling it at its source.

Respiratory Protection:

Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). For concentrations above the TLV and/or PEL but less than 10 times these limits, a NIOSH approved half-facepiece respirator equipped with appropriate chemical cartridges may be used. For concentrations greater than 10 times the TLV and/or PEL, consult the NIOSH respirator decision logic found in publication No. 87-116 or ANSI Z88.2-1992.

Glove Protection:

Neoprene or nitrile rubber gloves should be worn. Ensure compliance with OSHA's personal protective equipment (PPE) standard for hand protection, 29 CFR 1910,138.

Eye Protection:

Safety glasses with side shields if the method of application presents the likelihood of eye contact. Ensure compilance with OSHA's Personal Protective Equipment (PPE) standard for eye and face protection, 29 CFR 1910.133.

Wear protective clothing when handling. A safety shower and an eyewash station should be available. Remove soaked clothing and shoes. Wash clothing and clean shoes before re-use.

#### Section X - Storage and Handling Information

Storage Conditions Storage Temperature Max: 120°F (√) Indoors Min: 35°F [] Outdoors [ ] Refrigerated [ ] Heated

Precautions to be Taken in Handling and Storing:

Always store material in its original container. Keep the container tightly closed when not in use. Use with caution around heat, sparks, pilot lights, static electricity, and open flame. Empty containers may contain product residues which may exhibit the hazards of the product. To avoid possible explosion, do not pressurize, cut, weld, solder, drill, grind, or expose empty containers to heat, hot surfaces, sparks, or open flames. Ground and bond container when handling near flammable vapors and all sources of ignition. Bulk Storage: For maximum product life, store Indoors. Outdoor Storage Tip: Store containers on their side to help prevent water accumulation on a flat end and consequent product contamination.

Other Precautions:

Keep out of reach of children. Read the entire label before using the product. Follow the label directions.

Lab Memo: 08-016

Subject: **OEM Production Waste Evaluation 0108-83** 

A sample from OEM production waste has been evaluated as a potential recycle to be put into black oil. This stream is d-limonene which has been used to degrease pipe. Overall, this material looks good to bring in and mix with our black oil. It blends in well with the oil with no issues. Water is 1.6%, flash point is greater than 140 deg F and the chlor-d-tect is less than 400 mg/L.

**Expiration Date** 8/24/2009

Generator: LeTourneau Technologies

**Address:** 6401 West Sam Houston Parkway

Houston, TX

Waste Information

Name of Waste: Recyclable Oil / Water Mixture

TCEO Waste Code #: N/A

Container Type: Other

Bulk

**Detailed Description of Process Generating Waste:** 

Material generated from equipment oil changes.

**Color:** Light Brown

**Odor:** Oil Like

pH: Neutral

Physical State: Liquid

**Incompatibilities:** Oxidizers

Safety Related Data/Special Handling:

No

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President

## Waste Pre-Acceptance/Approval Letter

Date 1/31/2008

Dear Keith Hoye

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1108

Expiration Date 8/24/2009

Generator: LeTourneau Technologies

**Address:** 6401 West Sam Houston Parkway

Houston, TX

Waste Information

Name of Waste: Oil Contaminated Absorbent and Debris

TCEQ Waste Code #: CESQ3191

Container Type: Drum

**Detailed Description of Process Generating Waste:** 

From clean-up of spills around plant.

Color: Various

Odor: Oil Like

pH: Neutral

Physical State: Sludge

Incompatibilities: Oxidizers

Safety Related Data/Special Handling:

No

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

### Waste Pre-Acceptance/Approval Letter

Date 4/20/2006

Dear Timothy Crume

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1517

Generator: Petty Industrial Coaters

Address: 8000 Daffan Ln

Austin, TX, TX 78724

#### Waste Information

Name of Waste: Non-Haz Water TCEO Waste Code #: FFJ91191

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Non-haz powder is put on equipment and baked in an oven to adhere. Equipment is then

rinsed with clean water to remove any residual powder.

Color: Cloudy Odor: None pH: 6-8

**Physical State:** 

Incompatibilities: None

Safety Related Data/Special Handling:

Standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

PO.4 JATOT

(1)	If the waste contains oil and	rrease at or in excess	of 100 mg/L.	the waste should	be classified in the oils subcategor	v.
-----	-------------------------------	------------------------	--------------	------------------	--------------------------------------	----

(2) If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.

Cadmium: 0.2 mg/L Chromium: 8.9 mg/L Copper: 4.9 mg/L Nickel: 37.5 mg/L

(3)	If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or
	nickel above any of the values listed above, the waste should be classified in the organics subcategory.

	Metals Subcategory
	Oils Subcategory
X	Organics Subcategory

#### SECTION II: Additional Instructions

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

### **Waste Pre-Acceptance/Approval Letter**

Date 6/7/2006

Dear Connie Thompson

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1608

Generator: IHU @ 2807 Washington Avenue

Address: 2807 Washington Avenue

Houston, TX 77007

#### Waste Information

Name of Waste: RCRA empty drums

TCEQ Waste Code #: Recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Recyclable RCRA empty drums last containing gassy water. Drums will be a mixture of

poly and metal

Color: varies Odor: none to solvent pH: na

Physical State: Incompatibilities:

Safety Related Data/Special Handling:

Level D PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

### **SECTION 9: Generator's Certification**

The information contained herein is based on  $\boxtimes$  generator knowledge and/or  $\square$  analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of composition properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

		Oils Subcategory				
		Organics Subcatagory				

#### **SECTION 11: Additional Instructions**

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

## Waste Pre-Acceptance/Approval Letter

Date 6/7/2006

Dear Cash Kahn

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1606

Generator: IHU @7025 S. Loop East

**Address:** 7025 S. Loop East

Houston, TX 77087

### **Waste Information**

Name of Waste: UST Wastewater and Sludge

TCEQ Waste Code #: Recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Ethanol conversion of tanks

Color: Clear - Brown Odor: Gasoline pH: 6-8

**Physical State:** 

Incompatibilities: none

Safety Related Data/Special Handling:

Standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

## **Material / Product Approval Letter**

Date 8/22/2007

Dear Bill Shafer

Thank you for choosing CES Environmental Services, Inc. for your material / product recycling needs. The following material has been approved at our facility in Houston, TX. If the material received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 2305

**Producer:** Palm Center Police Station

Address: 5320 Griggs Road

Houston, TX 77021

#### Material / Product Information

Name of Material / Product Unleaded gas

**Container Type:** 

**UST** 

#### Detailed Description of Process Generating or Producing the Material / Product:

Residual removal of gas from UST

Color: brown

Odor: gas

pH: 7

**Physical State:** 

**Incompatibilities:** oxidizers

Safety Related Data/Special Handling:

proper PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc. \_Aug 21 07 04:48p

Approval Number:

<u>S</u> ]	ECTION 10: Waste Receipt Classification Under 40 CFR 437
Is	this material a wastewater or wastewater sludge?   YES   NO
If	'Yes', complete this section.
P	LEASE CHECK THE APPROPRIATE BOX. IF NO APPROPRIATE CATEGORY, GO TO THE NEXT PAGE.
Met	als Subcategory: Subpart A
	Spent electroplating baths and/or sludges Metal finishing rinse water and sludges Chromate wastes Air pollution control blow down water and sludges Spent anodizing solutions Incineration wastewaters Waste liquid mercury Cyanide-containing wastes greater than 136 mg/l Waste acids and bases with or without metals
	Cleaning, rinsing, and surface preparation solutions from electroplating or phosphating operations Vibratory deburring wastewater Alkaline and acid solutions used to clean metal parts or equipment
	Subcategory: Subpart B
	Used oils Oil-water emulsions or mixtures Lubricants Coolants Contaminated groundwater clean-up from petroleum sources Used petroleum products Oil spill clean-up Bilge water Rinse/wash waters from petroleum sources Interceptor wastes Off-specification fuels Underground storage remediation waste Tank clean-out from petroleum or oily sources Non-contact used glycols Aqueous and oil mixtures from parts cleaning operations Wastewater from oil bearing paint washes
<u>Org</u>	anics Subcategory: Subpart C
	Landfill leachate Contaminated groundwater clean-up from non-petroleum sources Solvent-bearing wastes Off-specification organic product Still bottoms Byproduct waste glycol
	Wastewater from paint washes Wastewater from adhesives and/or epoxies formulation Wastewater from organic chemical product operations Tank clean-out from organic, non-petroleum sources

(1)	ii me v	vaste contains on and grease at or in excess of 100 mg/L, the waste should be classified in the one subcategory.
(2)		vaste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess values listed below, the waste should be classified in the metals subcategory.
	Chrom Coppe	um: 0.2 mg/L ium: 8.9 mg/L r: 4.9 mg/L : 37.5 mg/L
(3)		vaste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, cabove any of the values listed above, the waste should be classified in the organics subcategory.
		Metals Subcategory
		Oils Subcategory

#### **SECTION 11: Additional Instructions**

Organics Subcategory

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

Lincoln Manufacturing 31209 FM 2978 Magnolia, TX 77354

Attn: Amy Hoffpauir

Re: Management of Phosphate Water

Dear Ms. Hoffpauir:

CES Environmental Services, Inc. appreciates the opportunity to present to you our proposal for the management of the above referenced material. Please find below our proposed scope of service and associated pricing for your consideration.

#### **Scope of Service**

- CES will prepare the waste profile documents on all products managed.
- CES will provide for the transportation to include the appropriate shipping documents.

#### **Pricing**

Treatment and management of phosphate rinse water: \$ 0.25 per gallon

CES Environmental Services, Inc.

RE: Non-Hazardous Phosphating Rinse Water Disposal

Dear Mr. Legg,

Thanks for your interest in CES Environmental Services, Inc. and our waste transportation and disposal services. Per your request, I have prepared the following quotation for the transportation and disposal of approximately 5,000 gallons per month of metals subcategory wastewater from your zinc phosphating operation:

• Transportation & Disposal of Wastewater:

\$ 0.245/gallon

Revised 5-15-0

Transportation rates do include fuel surcharges as published by the U.S. Department of Energy national average diesel price. All loads shipped will require, and be charged, a minimum of 4,000 gallons. Loading demurrage will be charged at \$68.00/hour plus the fuel surcharge for loading time greater than 1 hour.

Thanks again for your interest in CES Environmental Services, Inc. If you have any questions or additional needs, please feel free to contact me at (713) 416-4160.

p 4

Sincerely,

Sean Easton

RE: Non-Hazardous Phosphating Rinse Water Disposal

Dear Mr. Legg,

Thanks for your interest in CES Environmental Services, Inc. and our waste transportation and disposal services. Per your request, I have prepared the following quotation for the transportation and disposal of approximately 50,000 gallons per month of metals subcategory wastewater from your zinc phosphating operation:

• Transportation & Disposal of Wastewater:

\$ 0.185/gallon

Transportation rates do include fuel surcharges as published by the U.S. Department of Energy national average/diesel price. All loads shipped will require, and be charged, a minimum of 4,000 gallons. Loading demurrage will be charged at \$68.00/hour plus the fuel surcharge for loading time greater than 1 hour.

Thanks again for your interest in CES Environmental Services, Inc. If you have any questions or additional needs, please feel free to contact me at (713) 416-4160.

Sincerely,

Sean Easton

#### Sean,

We received a load from Lincoln Manufacturing, Friday morning, Phosphate rinse water, on manifest #3595591 it had 18% solid content, I just wanted you to be aware that it had high solids concentration. If you have any question please respond. Thanks.

### Waste Pre-Acceptance/Approval Letter

Date 7/21/2006

Dear Jim Legg

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 1684

Generator: Lincoln Manufacturing - Magnolia

**Address:** 31209 FM 2978

Magnolia, TX 77354-2388

#### Waste Information

Name of Waste: Phosphating Rinsewater

TCEQ Waste Code #: CESQ1192

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Wastewater associated with a zinc phosphating line including cleaning vat, phosphating vats and rinsewaters.

Color: Tan Odor: none pH: 4-11

**Physical State:** 

Incompatibilities: none

Safety Related Data/Special Handling:

None

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

#### SECTION 4: Physical and Chemical Data

KECONY BY CONTENDES IN DAY BUTTE	legicentis Ben	or %	
The waste consists of the following materials	Ranges are acceptable		
Rinsewater	90-95	%	
Alkaline Cleaners	1-2	%	
Phosphate Salts	1-5	%	

#### SECTION 5: Safety Related Data

If the handling of this waste requires the use of special protective equipment, please explain. None

#### **SECTION 6: Attached Supporting Documents**

List all documents, notes, data, and/or analysis attached to this form as part of the waste approval package.

See SPL analytical - 04050449-01

#### **SECTION 7: Incompatibilities**

Please list all incompatibilities (if any):

None

#### SECTION 8: Generator's Knowledge Documentation

Laboratory analysis of the hazardous waste characteristics, listed below, WAS NOT PERFORMED based upon the following generator knowledge:

TCLP Metals:

TCLP Volatiles:

No volatile organics are part of process

TCLP Semi-Volatiles:

No semi-volatile organics are part of process

Reactivity:

No reactive materials are part of process

Corrosivity:

pH is held nuetral by customer

Ignitability:

No flammable materials are part of process

#### SECTION 9: Generator's Certification

The information contained herein is based on  $\boxtimes$  generator knowledge and/or  $\boxtimes$  analytical data. I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful omissions of composition properties exist and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this document.

RE: Non-Hazardous Phosphating Rinse Water Disposal

#### Dear Mr. Legg,

Thanks for your interest in CES Environmental Services, Inc. and our waste transportation and disposal services. Per your request, I have prepared the following quotation for the transportation and disposal of approximately 5,000 gallons per month of metals subcategory wastewater from your zinc phosphating operation:

Transportation & Disposal of Wastewater:

\$ 0.245/gallon

Transportation rates do include fuel surcharges as published by the U.S. Department of Energy national average diesel price. All loads shipped will require, and be charged, a minimum of 4,000 gallons. Loading demurrage will be charged at \$68.00/hour plus the fuel surcharge for loading time greater than 1 hour.

Thanks again for your interest in CES Environmental Services, Inc. If you have any questions or additional needs, please feel free to contact me at (713) 416-4160. Olay price

Sincerely,

ean Easton
